

TFC WHITE LIGHT PREMIUM FLEECE

White Light Premium fleece protects the surface against dirt and damage. The material absorbs extremely, is liquid-proof and very light in weight, and therefore easy to bring along to every construction site.

Due to its flexibility it is ideal for covering stairs and other uneven surfaces, which makes it a great alternative for traditional carton board.

Standard reels are available in 20m² and 40m² with a width of 100cm.

Application areas:

TFC White Light Premium is a versatile material that can be used amongst others for covering laminate, linoleum, parquet floor, tiles, synthetic floors, stone and concrete.

Features:

- 130 gr/m²
- Super light-weight
- Extremely absorbing
- Strong material
- Flexible
- Lint-free
- Non-slip layer on lower surface
- Liquid-proof
- Unreels smoothly
- Minimal waste load
- Reusable

Instructions for use:

Surface must be dry, clean and hardened. Try at an unobtrusive area before use.

Please note: TFC White Light Premium fleece is not resistant against aggressive substances. For protection of freshly laid, not yet hardened floors we recommend TFC Breathable Liner.
