

TFC NON-WOVEN FLEECE

Non-woven fleece protects surfaces against dirt and damage.

TFC non-woven fleece is made of quality textile fibers and produced making use of state-of the art technologies. The covering material is safe, absorbing, liquid- and shock-proof. High flexibility guarantees ease of use, also on uneven surfaces.

Standard reels are available in 10m², 25m² or 50m² with a width of 100 cm.

Application areas:

All-purpose protection indoors.

Features:

- Quality fibers
- Filtered from respirable dust
- Free of hazardous substances (tested under REACH regulation)
- Non-slip layer on lower surface
- Absorbing
- Lint-free
- Flexible
- Reusable
- Liquid-proof
- Reels are packed in plastic bag

Instructions for use:

Surface must be dry, clean and hardened. Try at an unobtrusive area before use.

Please note: TFC non-woven fleece is not resistant against aggressive substances. For protection of freshly laid, not yet hardened floors we recommend TFC Breathable Liner.
